

Artyom Tsaryuk

LEAD SOFTWARE ENGINEER

Moscow, Russia | +79031346306 | rtem903134@gmail.com

Results-driven Lead Software Engineer with 5+ years of experience. Specialized in fintech systems, distributed architectures, and high-load backend development, delivering large-scale payment solutions (CBDC, FPS).

Currently pursuing a Master's degree in Computer Science; consistently rated top performer (A-A).

Seeking to build scalable, fault-tolerant systems and lead engineering teams in complex fintech or platform environments.

Key Competences

Java/Kotlin | Spring Boot | Kafka | Kubernetes | System Design | PostgreSQL | Microservices | English B1

SYSTEM DESIGN & FINTECH ARCHITECTURE

- Led development of Digital Ruble (CBDC) services, delivering ~40% of total system functionality across 19 scenarios (B2B & B2C).
- Designed cross-border payment processing, enabling international transaction flows within regulated fintech infrastructure.
- Built QR payment and terminal facade services, contributing to production rollout (featured in national-level fintech coverage).
- Integrated ESIA consent system, enabling secure onboarding for Digital Ruble accounts.

BACKEND DEVELOPMENT & HIGH-LOAD SYSTEMS

- Developed high-load microservices using Spring Boot, Kafka, and PostgreSQL, ensuring reliability in mission-critical payment systems.
- Implemented asynchronous mTLS certificate rotation via HashiCorp Vault, improving security and reducing manual operations.
- Resolved race conditions in distributed search services via index-level locking, increasing system stability.
- Built merchant data storage service for FPS acquiring (B2B), improving data consistency and processing efficiency.

LEADERSHIP & ENGINEERING EXCELLENCE

- Led full-cycle development: architecture design, implementation, E2E testing, and production support.
- Mentored developers and conducted technical interviews, contributing to team growth and hiring quality.
- Introduced E2E testing practices using TestContainers and WireMock, improving release reliability.
- Joined project at peak load and delivered critical features on tight deadlines without quality degradation.

Work Experience

MTC Web Services (MWS) Lead Software Engineer	2023 – now
Sberbank-Technology Kotlin Software Engineer	2022 – 2023
Cristalix.gg Full Stack Engineer	2020 – 2022

Education

Moscow Institute of Physics and Technology (MIPT), Moscow Computer Science; Master's Degree	2027
Moscow State University of Psychology & Education, Moscow Technical Sciences; Bachelor's Degree	2025
